

CNG & EV USERS FORUM

CEUF

"Uniting Users. Driving Clean Energy Mobility."

INSTITUTIONAL PROFILE

ABUJA, NIGERIA

01 Who We Are

The CNG & EV Users Forum (CEUF) is a stakeholder platform uniting current and prospective users of Compressed Natural Gas (CNG) and Electric Vehicles (EV) across Nigeria's growing clean-mobility sector.

As adoption accelerates, users face a common gap: limited access to reliable information, safety guidance, and a structured voice within the ecosystem. CEUF exists to close that gap — connecting users to knowledge, to each other, and to the wider clean-mobility industry.

USER-CENTRED	NON-PARTISAN	ABUJA-BASED	OPEN MEMBERSHIP
--------------	--------------	-------------	-----------------

What we are not: CEUF is not a vendor, financier, regulator, or political organization. We are a user-representative forum focused on informed, safe, and responsible clean-mobility adoption.

WHO WE SERVE

CNG Vehicle Owners

Prospective CNG Users

EV Owners & Prospective Users

Transport Operators

Drivers

Technicians

Fleet Owners

Clean-Mobility Enthusiasts

02 What We Stand For

OUR VISION

A Nigeria where every CNG and EV user adopts clean mobility with confidence, safety, and full access to reliable information.

OUR MISSION

To unite, inform, and represent users of CNG and EV technology — building a trusted bridge between users, industry, and government.

OUR OBJECTIVES

Responsible CNG / EV Adoption	User Education
Safety Awareness	Technical Knowledge Sharing
Stakeholder Engagement	Access to Opportunities
User Feedback & Representation	Sustainable Transport Ecosystem

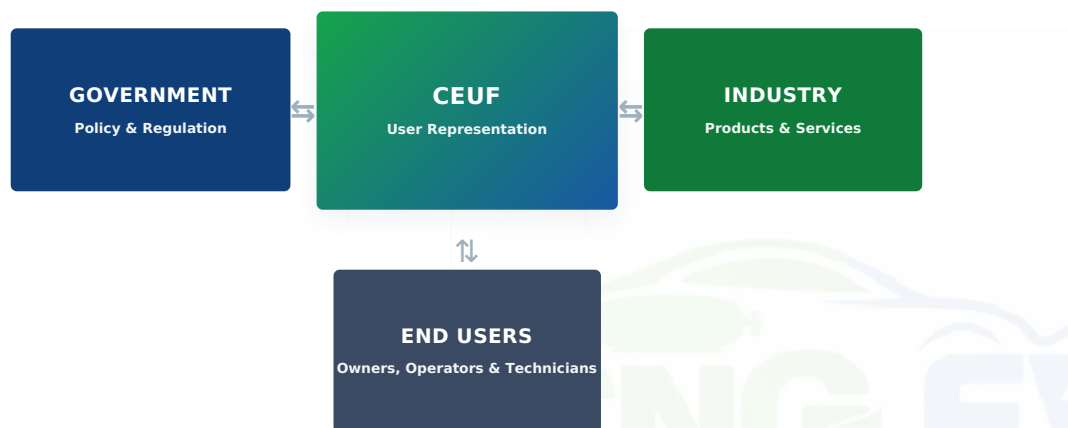

03 What We Do

- Public education and awareness campaigns on CNG / EV safety and use
- Technical knowledge sessions with qualified partners
- Structured feedback channels from users to industry and government
- Facilitated stakeholder meetings and courtesy engagements
- Clean-mobility advocacy and community outreach

OUR POSITION IN THE ECOSYSTEM

CEUF sits at the centre of Nigeria's clean-mobility ecosystem — a structured channel through which government policy, industry innovation, and user experience meet.

CEUF gives businesses a credible route to informed users, and gives users access to legitimate products, services and opportunities — transparently and verifiably.

04 Stakeholder Engagement

CEUF maintains an active liaison structure with government agencies, industry players, and technical partners — always as a user-representative body, not a statutory or regulatory one.

- Courtesy visits and stakeholder recognition
- Structured liaison with industry and public-sector agencies
- User feedback and engagement sessions
- CNG safety sensitisation activities
- Policy and technical input submissions
- Clean-mobility community initiatives

Stakeholder engagement session

CEUF delegation — courtesy visit

Liaison discussion with an industry partner

CEUF's engagements are advisory and representative in nature. They do not constitute statutory authority or government endorsement beyond what is expressly granted.

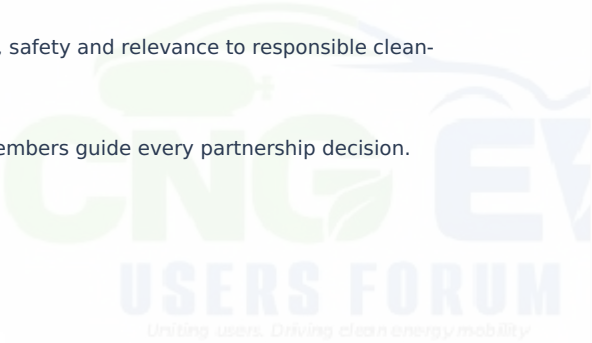

05 What We Bring to Partners

CEUF provides partners with structured access to a growing community of actual and prospective clean-mobility users, while promoting responsible information, transparency and user protection.

Access to Potential Customers	Product Awareness	User Education
Stakeholder Engagement	Feedback from Real Users	Market Intelligence
Product Demonstrations	Structured Community Outreach	Clean-Mobility Campaigns

PARTNERSHIP PRINCIPLES

- 1 CEUF does not automatically endorse every product, service or commercial proposal presented to its members. Partnership opportunities are subject to appropriate verification, transparency and alignment with the Forum's objectives.
- 2 Every partnership is assessed for credibility, safety and relevance to responsible clean-mobility adoption.
- 3 CEUF's independence and the trust of its members guide every partnership decision.

06 Current Partnership Opportunity

"CEUF is open to structured partnerships with credible businesses providing CNG and EV products, infrastructure, financing, technical services and other solutions that support responsible clean-mobility adoption."
